Education

Full stack devloper
Masai School
March 2024-present

Computer Science
Tirumala Engineering College
August 2015 - July 2019

Technical Skills

CSS3 Git HTML5

JavaScript React

RESTful APIs

Responsive Web Design

Redux

Soft Skills

Effective Communication

Time Management

Problem Solving

Anshu kumari

Professional Summary

Dynamic Frontend Developer with sound expertise in JavaScript and React.js framework. Experienced in building responsive, high-performance applications and skilled in RESTful API integration. Keen on leveraging Generative AI to boost efficiency and quick at mastering new technologies.

Experience

idbi | support   June 2020 – April 2022
- Collaborated with designers, product managers, and backend developers at IDBI from 2020 to 2022, to craft functional and visually appealing user interfaces.
- Utilized React.js and related technologies to develop high-quality, reusable, and scalable code, ensuring responsive designs across various devices and browsers.

Projects

Pro shop   Live Demo Link   Github Repo Link
- Developed and maintained high-quality, scalable front-end components using React.js for an e-commerce platform.
- Optimized applications for maximum speed and scalability by implementing clean, efficient, and maintainable code.
- Integrated backend services using RESTful APIs and managed state with Redux or Context API.
- Ensured technical feasibility of UI/UX designs and stayed updated with the latest trends in React development.

Hotflix   Live Demo Link   Github Repo Link
- Built a streaming platform web application replicating core features and user interface of Hotstar using React.js.
- Implemented smooth video playback with adaptive streaming options and provided standard video controls.
- Focused on component structure & reusability, data fetching and API integration, routing, user authentication, and state management.
- Designed detailed media pages and categories for movies, TV shows, live sports, and originals.
