Akash Kevat

Full Stack Web Developer

Professional Summary

Meticulous Full Stack Web Developer with expertise in the MERN stack, demonstrating advanced skills in JavaScript, React.js, and Node.js. Proven track record of implementing scalable solutions and rapidly adopting emerging technologies. Strong problem-solving aptitude with a focus on writing clean, efficient code. Committed to continuous learning and fostering collaborative development environments.

Projects

Library Management   Live Demo Link   Github Repo Link

JavaScript | React | Git | Node.js | Express.js

MongoDB | RESTful APIs

Responsive Web Design

- Developed an efficient and scalable RESTful API for the Library Management System using Node.js and Express.js.
- Implemented robust role-based access control and secure authentication mechanisms to manage library resources.
