Professional Summary

Full stack developer with strong expertise in Node.js, Python, and MongoDB, experienced in designing and implementing scalable web applications. Skilled in building RESTful APIs, managing version control with Git, and developing responsive frontends using HTML5, JavaScript, and CSS3 for seamless user experiences.

Education

Full Stack web development
Prepleaf by Masai
February 2023-present

B.Sc. (Mathematics)
Jai Narain Vyas University, Jodhpur
July 2022-present

Projects

Skinstore-clone   Live Demo Link   Github Repo Link

React JavaScript HTML5 CSS3 Redux Chakra UI

- Utilized React.js and Redux to create dynamic and responsive web components for the Skinstore clone application.
- Integrated JSON-Server to simulate backend communication, enabling real-time dynamic data handling and display.
- Designed and implemented a search functionality, allowing users to filter products based on input instantaneously.
- Implemented Chakra UI for maintaining a modern and responsive design, enhancing user experience.
- Focused on interactive user interfaces and seamless user experience by ensuring responsiveness and dynamic content rendering.

Technical Skills

Node.js RESTful APIs MongoDB HTML5 JavaScript CSS3 Python React Redux DSA Git Django

Recipe Sharing Platform   Github Repo Link

Python HTML5 CSS3 Django JavaScript RESTful APIs

- Developed a recipe-sharing platform using Django, implementing robust backend models, views, and serializers.
- Integrated JWT authorization for secure user authentication and session management.
- Served frontend components using Django's static file handling, ensuring seamless user interaction.
- Implemented user authentication with custom registration views and login functionality, leveraging Django's User model.
- Designed RESTful API endpoints with Django REST Framework, facilitating efficient data management.
