OBJECTIVE

As a dedicated Full Stack Developer with 2 years of hands-on experience, I am committed to leveraging my robust skill set, honed through my education at Bhopal School of Social Sciences, to contribute effectively to dynamic projects. Currently employed in this capacity, I specialize in utilizing React.js for dynamic frontend development and .NET for powerful backend solutions. My passion for crafting seamless user experiences propels me to excel in both frontend and backend development, ensuring efficient and responsive web applications. I am eager to contribute my expertise and continue growing within a challenging environment.

EDUCATION

Bachelor of Computer Science, THE BHOPAL SCHOOL OF SOCIAL SCIENCES   2018 - 2021

SKILLS

Technical Skills	Responsive web design, React.js, .Net Core, Entity Framework Core, SSMS, Power Automate, Power BI, Restful APIs, Redux Toolkit, Deployment and Management, HTML, CSS, JavaScript
Soft Skills	Communication, Collaboration, Problem-solving, Time management
Additional Skills	Attention to detail, Adaptability, Team player, Critical thinking

EXPERIENCE

Software Engineer   May 2022 - Present
Ilink Digital, Pune

- Currently employed as a Software Engineer, contributing to the development and enhancement of cutting-edge software solutions.

System Engineer   Dec 2021 - May 2022
CTS, Pune

- Previously worked as a System Engineer at CTS, where I contributed to the design, implementation, and maintenance of IT systems and infrastructure.

PROJECTS

Employee Reward Portal
Platform: React.js + .NET Core + SQL Server
Details: As the primary developer for an Employee Reward Portal, I played a pivotal role in empowering managers to seamlessly allocate points for recognizing employee achievements. Leading the implementation of badge functionality, I fostered a culture of positivity and teamwork within the organization. Ensuring responsiveness across devices, I prioritized an intuitive user experience to optimize engagement and interaction. Moreover, I facilitated a feature allowing employees to utilize earned points for purchasing gifts directly through the portal. Additionally, I meticulously utilized version control to manage and track project changes, ensuring efficient collaboration and code management.

Development of Derevos Application
Platform: React.js + .NET Core + SQL Server + SSMS + Power BI + Power Automate
Details: I contributed significantly to the development of the Derevos application, a comprehensive system aimed at streamlining various processes within the organization. Leveraging React.js and .NET Core, I participated in architecting and building the application's frontend and backend components. Additionally, I integrated SQL Server Management Studio (SSMS) to manage and optimize the database structure, ensuring efficient data storage and retrieval. Furthermore, I implemented Power BI to provide insightful data visualization, empowering stakeholders to make informed decisions based on real-time analytics. Leveraging Power Automate, I automated repetitive tasks and workflows, enhancing overall productivity and efficiency.
