EDUCATION HISTORY

Graduation

B.E (Electrical Engg)
University: Gondwana University

Year of Passing:2018

PROFILE SUMMARY

I have 3 years of experience in application development and customer-facing roles. I am proficient in OOP concepts and implementation, with expertise in .NET Framework, C#, ASP.NET, LINQ, Lambda Expressions, and REST Web APIs. I have extensive experience consuming RESTful APIs using JavaScript and jQuery, and working with SQL Server for writing stored procedures, queries, and accessing database tables, SPs, and triggers via ADO.NET and Entity Framework. Additionally, I am familiar with testing tools like Postman and front-end technologies such as HTML5, CSS3, Bootstrap, and JavaScript. I design and implement solutions following SOLID principles and design patterns.

WORK EXPERIENCE

April 2021 to Present

- Developed and maintained applications using .NET Framework, C#, ASP.NET, and MVC.
- Created and consumed RESTful APIs with JavaScript and jQuery.
- Worked extensively with SQL Server, writing stored procedures, queries, and handling database operations with ADO.NET and Entity Framework.
- Utilized Postman for API testing.
- Developed front-end components using HTML5, CSS3, Bootstrap, and JavaScript.

PROJECTS

OneStop Service Hub

OneStop Service Hub is a Web application which Developed an application that provides users with information, contact details, and offers from various shops, and allows them to book service providers such as electricians and plumbers, all in one place.
