SUMMARY

Innovative .NET Developer with experience **2 Years** in analysis designing ,developing and maintaining web applications using .NET framework technologies **C#, ADO.NET, ASP.NET, ASP.NET MVC, .Net Core.** Strong problem-solving and analytical ability are among the demonstrated strengths.

SKILLS

- **Technology** : C# , ADO .Net , ASP .NET , ASP .NET MVC , .Net Core, Entity Framework , Web API'S

- **Web** : HTML, CSS ,Bootstrap , Angular .

- **Scripts** : JavaScript , jQuery ,Ajax

- **Database** : MS-SQL Server , My SQL .

- **System and Software** : Visual studio , Ms-sql server .

- **Other Tools** : GitHub , Jira .

- **Hosting** : Web Hosting .

EDUCATION

Savitribai Phule Pune University

Bachelor's of Computer Application

ROLES AND RESPONSIBILITY

Gaya Software and Technology

- Hands on object oriented concepts like Data Abstraction, Inheritance, Data Encapsulation, Polymorphism using C#.Net .

- Used ADO.NET framework such as Connection, Command, Data Adapter and Data Reader to consistent access and manipulate the SQL data sources.

- Followed agile scrum methodology in application development. & Designed Web pages using ASP.NET including master page, custom control.

- Experienced working in MVC Using ViewBag, ViewData and TempData to pass data to Views. Used Data Annotation, Partial Views, Layouts, Strongly Typed views in MVC.

- Designed the front-end screens using HTML, CSS, and client side scripting in Java Script, Ajax.

- Extensive experience in all phases of Software Development Life Cycle (SDLC) including identification of business needs and constraints, collection of requirements, detailed design, implementation, testing, deployment and maintenance.

PROJECTS

GAYA EMPOWER ERP

Role : Team Member
Technology : C# ,ASP.Net MVC , Javascript , JSON ,HTML, CSS ,Bootstrap, jQuery

Educational Resource Planning System is designed to enhance business processes across various departments within an organization. It integrates the core processes of business, providing a centralized platform for managing resources, streamlining workflows, and improving collaboration between departments. This project has been developed using Visual Studio and SQL Server Management System with the .NET Framework. The goal is to enhance efficiency, data accuracy, and decision-making capabilities. Additionally, the system ensures robust data security, scalability, and real-time reporting for better organizational insights.

MATRIMONIAL

Role : Team Member
Technology : C# ,ASP.Net MVC , Javascript , JSON ,HTML, Bootstrap,CSS , jQuery

Matrimonial is developed in Visual Studio and MSSQL Server. It is a website designed to help individuals find suitable life partners. It works as a bridge between individuals seeking marriage, providing them space to create profiles, search for potential matches, and communicate with interested parties. The platform ensures privacy and security, enabling users to interact in a safe environment. It also includes advanced search filters to help users find matches based on preferences and compatibility.

HOME STAY MANAGEMENT SYSTEM

Role : Team Member
Technology : C# ,ASP.Net MVC , Javascript , JSON ,HTML, CSS ,Bootstrap, jQuery

The Home Stay Management System is a Windows platform developed to efficiently manage the day-to-day operations of HomeStays. It simplifies the entire process of managing reservations, guest check-ins and check-outs, room allocations, billing, and customer feedback. It reduces administrators' burdens, improves accuracy in record-keeping, and enhances guest satisfaction by providing easy access for all. The system also offers real-time updates and reports, ensuring effective monitoring and decision-making. Additionally, it supports seamless communication between the staff and guests, ensuring smooth operations throughout their stay.

DECLARATION

I hereby confirm that all the facts started above are accurate to the best of my belief.
