Responsibilities : Analysis, Documentation and development of the modules as per client requirement.
Writing Unit Test cases
Raising pull request and deployment on Dev, INT and QA environments.
Resolving real time technical issues within given timeline
Testing the modules for the required functionalities and fixing bugs

Technical Skills

- Languages : JavaScript, JSON, TypeScript
- Microsoft Technologies : C# .NET, Rest API, Entity Framework, ASP.Net, ASP.Net MVC
- Database : SQL Server
- Backend Technologies : Html, Css, Angular

Professional Experience

Software Developer, *(Dench Technologies)*
November 2022 – present | Pune, India

- Continuously learning and improving my C#.NET skills, staying updated on best practices, and exploring new technologies.
- Writing C# code to implement backend functionalities of web applications or software systems. This involve creating APIs, handling data processing, and ensuring server-side logic.
- Working with databases, creating and modifying database schemas, writing SQL queries, and using Object-Relational Mapping (ORM) tools like Entity Framework to interact with databases.
- Identifying and resolving issues or bugs in the backend code, and collaborating with the team to fix them.
- Using version control systems (Git) to manage and collaborate on code changes with the development team.
- Collaborating with other team members to ensure that the entire software application works seamlessly.
- Assisting the team in project planning, task management, and contributing to the overall success of the project.

Associate Operations, *(WNS)*
August 2021 – June 2022 | Pune, India

- Perform various administrative tasks, enforcing the organization's policies and standards, and assisting with recruitment activities.
- Tracking daily operations and reporting or resolving issues.
- Maintaining company databases.
