Sanjoli Goyal

Professional Summary

Detail-oriented Full Stack Web Developer with robust skills in the MERN stack, specializing in efficient web application development. Excels in collaborative environments and thrives on building scalable solutions. Adept at utilizing Generative AI for innovative problem-solving and continuous learning of emerging technologies.

Experience

Infotech | Software Developer

- Collaborated effectively with cross-functional teams, including product managers and designers, to develop scalable web applications using MERN stack.
- Designed and optimized database models and queries using MongoDB, significantly improving application performance and data retrieval speed.
- Implemented responsive user interfaces with React.js, adhering to best practices to enhance user experience and front-end functionality.

Projects

Currency Convertor Github Repo Link

JavaScript HTML5 CSS3

- Developed a currency converter app using JavaScript, HTML, and CSS to convert amounts in real-time.
- Integrated external APIs for fetching live exchange rates, ensuring accurate and up-to-date conversions.
- Implemented JavaScript to handle conversion logic and data retrieval efficiently.
- Created a user-friendly interface with HTML and styled with CSS for optimal user experience.

Rock Paper Scissor Github Repo Link

JavaScript HTML5 CSS3

- Developed a dynamic Rock, Paper, Scissors game using JavaScript to handle the game logic and interactions.
- Utilized HTML to create an interactive game interface and CSS for engaging styling.
- Ensured cross-browser compatibility and responsive design for optimal performance across different devices.
