## PROFILE SUMMARY

Highly skilled Frontend Developer with expertise in the JavaScript, HTML, CSS and modern front-end frameworks like React and Tailwind CSS. Proven ability to deliver responsive, user-friendly solutions through projects such as Kissan-Bazzar and Galaxia AI Assistant

## EXPERIENCE

**HertzWorks Pvt Ltd** ↗                                                                      **Oct'24 - Present**
*Role-Frontend Developer*                                                                                  *Remote*
- Collaborating on diverse projects using **React**, along with **HTML, CSS, JavaScript, Tailwind CSS & Bootstrap**, to build dynamic web applications.
- Managing version control and project collaboration efficiently through **GitHub**.

**Codsoft Infotech** ↗                                                                           **Jun'24 - Sep'24**
*Role-Frontend Developer Intern*                                                                            *Remote*
- Developed front-end features remotely using **React, HTML, and CSS**, while managing version control with **GitHub**.

**Prodigy Infotech** ↗                                                                           **Feb'24 - May'24**
*Role-Full Stack Developer Intern*                                                                          *Remote*
- Contributed to development and optimization of web applications using the **MERN stack**, focusing on feature implementation, database configuration, and performance enhancement.

**Ecoaqua Pvt Ltd** ↗                                                                             **Jul'23 - Dec'23**
*Role-Programmer Trainee*                                                                                   *Nashik*
- Performed coding and programming tasks using **C++** and **JavaScript** to improve software functionality and performance.

## PROJECTS

**Kissan-Bazzar: Farm-to-Consumer** ↗ | React, Node.js, MongoDB, Express, HTML, CSS          **Jan'24**
- Developed a robust MERN platform featuring 12+ product categories, including fruits and spices, with seamless user navigation and advanced filtering to enhance the shopping experience.
- Integrated reviews and order tracking, boosting user engagement by 10% in test environments.

**Galaxia: AI Chat Assistant** ↗ | React, API Integration, CSS, HTML                           **Nov'23**
- Created a responsive AI chat assistant leveraging Google's Gemini API, achieving a 98% response accuracy during trials.
- Improved user experience by designing a dynamic chat interface aimed at encouraging daily interaction and engagement.

## TECHNICAL SKILLS & INTEREST

- **Programming Languages:** JavaScript, C++
- **Web Technologies:** HTML, CSS, Node.js, Express.js
- **Libraries/Frameworks:** ReactJs, Bootstrap, Tailwind
- **Database/Cloud Technologies:** MongoDB, Mongoose, AWS, Google Cloud
- **Problem-Solving:** Data Structures & Algorithms
- **Software Development Practices:** SDLC, Unit Testing, Web Security
- **Version Control/Other Tools:** GitHub, Figma, Canva, VSCode
- **Soft Skills:** Communication, Teamwork, Problem-solving

## CERTIFICATIONS

- Meta Front-End Developer ↗

## EDUCATION

**K. K. Wagh College of Engineering, Nashik**                                                   **2019 – 2023**
*B.Tech - AE    CGPA - 8.5/10*                                                                *Nashik,Maharashtra*
