OBJECTIVE

I would like to be a part of an organization where I could use and enhance my knowledge and talent for the development of organization and myself.

PROFESSIONAL SUMMARY

- Total 2 years of experience in **Full - Stack Development**. .
- I have worked in **CitiusTech** as Software Engineer.
- I have Good Knowledge of **JIRA** and **GITHUB.**
- I have Good Knowledge of **Debugging** in Large Level Project.
- I have Good Knowledge of **OOPS Concept**.

TECHNICAL SKILLS

Languages: C#.
Operating Systems: Window, Linux
Framework: DotNet, Angular
Other Web Technologies: HTML. CSS, JavaScript, TypeScript.
Database and Server: SQL Server.

WORK EXPERIENCE

Project1

Duration: Apr 2023–Oct 2023

Project Title	Majestic Pride
Description	Developed a dynamic dashboard for a casino management system, designed to monitor agent commissions, manage registrations, and facilitate customer coupon redemption. This application enhances operational efficiencies through real-time analytics and comprehensive data management.
Main Technologies	Angular, .NET , SQL Server.
Roles and Responsibilities	- Implemented responsive **user interfaces** with Angular - Implemented the modules using Angular and Angular **Primeng.** - Development with Real time design patterns. - Developing scalable and secure **RESTful APIs** to support communication between the frontend Angular application and the backend services. - Integrating with SQL Server to perform **CRUD** (Create, Read, Update, Delete) operations on database entities such as user profiles, transactions, and commission records.

Project2

Duration: Aug 2022–Mar 2023

Project Title	GMS - ECT (Emerson Climate Technologies)
Description	Developed a web application for comprehensive monitoring and management of container temperatures on ships worldwide. The application leverages cellular networks to provide real-time updates on container location and overall health, ensuring optimal conditions for perishable goods like food and fish.
Main Technologies	Angular, .NET , SQL Server.
Roles and Responsibilities	- Implemented the modules using Angular and Angular **Primeng**. - Fixed existing issues with good **Debugging** strategies. - We were Using **JWT Token** for authentication. - Integration of **Restful Api's** in Angular. - Wrote **Media Queries** for responsiveness. - Developing RESTful APIs to expose endpoints for retrieving and updating container temperature data, location information, and health status. - Implementing business logic for real-time monitoring, **anomaly detection**, and **alerting** based on predefined thresholds and rules. - Integrating with SQL Server to store and manage container data, historical records, and user preferences.

Internship

Duration: Jan2022–Jun 2022

Completed a comprehensive six-month internship at CitiusTech, gaining practical experience and intensive training in a variety of modern software development technologies. Enhanced skills in **Angular, .NET**, and **Java,** with additional hands-on experience in **SQL Server** for database management and **C#** for back-end development. This rigorous training was paired with practical applications using **Git** for effective version control.

EDUCATION

2022   B.tech from ADCET, Sangli (Shivaji University); secured **60%.**
2018   Diploma from LESP Collage Sangli (MSBTE); secured **78.33%.**
2015   10th from Dadhge Highschool (SSC); secured **81.44%.**

PERSONAL DETAILS

Date of Birth: 21st Dec 1999
Languages Known: English, Marathi, Hindi.
Address: New Timber area, Sangli, 416416.
