Inderjeet Singh

Full Stack Web Developer

Professional Summary

Dedicated full-stack developer with expertise in the MERN stack, proficient in JavaScript and creating scalable web applications. Strong problem-solving and collaboration skills, adept at integrating frontend and backend components. Capable of utilizing Generative AI and rapidly learning new technologies to enhance development processes.

Projects

Car Rental & Sales Platform   Github Repo Link

JavaScript Node.js Express.js MongoDB

JWT React

- Developed a full-stack platform for vehicle rentals, purchases, and cab services using the MERN stack.
- Designed and implemented secure authentication and database management for efficient handling of user bookings and transactions.
- Created an intuitive UI with seamless navigation and real-time data updates integrating React with Node.js.

Task Manager   Github Repo Link

JavaScript HTML5 CSS3

Responsive Web Design LocalStorage

- Developed task management web application allowing users to add, delete, and manage tasks with ease.
- Designed a clean interface using HTML5, CSS3, and JavaScript for seamless user experience.
- Implemented task categorization into private, work, and home categories to enhance task organization.
- Utilized local storage to ensure data persistence across page refreshes, improving user experience.
- Applied best practices in responsive web design to ensure the application is accessible on various devices.
