EDUCATION

University of Pune — July 2023
Bachelor of Technology in Computer Engineering — *9.10 CGPA*

EXPERIENCE

Associate Software Engineer — January 2023 – April 2024
HHAeXchange — *Pune, India*

- **Redesigned** the search results **UI with infinite scrolling** by enhancing API and SQL query, achieving **200% performance improvement** and smoother navigation for end-users.
- **Designed and developed RESTful APIs** to streamline communication between backend and frontend systems, ensuring seamless integration within a high-demand enterprise ecosystem.
- Implemented **exception handling** mechanisms and **test cases** to improve fault tolerance and maintain high application quality.
- Refactored legacy **stored procedures** to meet new feature demands, ensuring system compatibility and **improved database maintainability**.
- **Built dynamic UI components**, including an **expandable text component** for readability and a **grid layout with sorting** and row toggling, enhancing interactivity and responsiveness across devices.

Software Developer (Freelance) — July 2024 – December 2024
Phownd.com

- Developed and deployed a **cross-platform dating app** with features **like swiping (like/dislike), location-based profile search, real-time notifications, and chat** for matched users.
- **Collaborated with the client** to design and implement core features, **helped launch the MVP**, enabling the startup to onboard its early users and demonstrate product viability.

PROJECTS

Codemore | ⦿ | ⬈
- Created an **online program executor similar to LeetCode**, allowing users to solve problems, test solutions, get instant results, and contribute to a collaborative problem set.
- Technologies: React, TypeScript, Redux, Node.js with Express, MongoDB Atlas

DevMate | ⦿ | ⬈
- Built a **social networking platform** which allows finding teammates (developers) for a project.
- Technologies: React, JavaScript, Tailwind CSS, Firebase, Redux, MUI(Material UI)

Safe History | ⦿ | ⬈
- Published a Google **Chrome extension** which prevents storing browser history using keywords mentioned by the user.
- Technologies: HTML, CSS, TypeScript

SKILLS

Languages: Python, TypeScript, C# — **Frontend** : HTML, CSS, JavaScript, Angular, React — **Backend** : ASP.NET Core, Node.js, Enitity Framework Core, SQL, SQL Server, PostgreSQL — **Tools** : Git, Docker

ACHIEVEMENTS

- Secured **rank 1 amongst 20+ teams** in the **Hackathon** organized by Devsnest | ⬈
