III. PROJECT EXPERIENCE

A. Project: APAR

APAR is one of the largest cable and conductor manufacturer in the world.
This project is to Assist Apar Industries in automation of the commodity, currency risk and hedge accounting lifecycle.
Current State: Currently, Apar is maintaining all the functionalities required for hedge accounting manually using excel spreadsheets.
Future State: aim to reduce the effort by bringing the automation in the entire project.

Role & Responsibilities:
- Worked as full-stack developer for various modules in the application.
- Unit testing & bug fixing reported by QA.
- Worked on User Role Permission.

- Utilized SQL Server both for the purpose of storing data in tables and for creating stored procedures.

Platform: Dot Net Core Web API, Angular, JavaScript, Typescript, SQL Server, Rest API's integrated

B. Project: HuntScaler

HuntScaler is a cost-effective online assessment platform that simplifies the recruitment process. It can be used to screen candidates for technical and non-technical roles via skill-based assessments. The platform lets you easily create custom assessments, monitor them in real-time, and shortlist candidates as soon as the tests are over. Salient platform features include automated scoring, face monitoring, enhanced code editor, broadcasting, and live chat support.

Role & Responsibilities:
- Worked as full-stack developer for various modules in the application.
- Unit testing & bug fixing reported by QA.
- Utilized MySQL both for the purpose of storing data in tables and for creating stored procedures.

Platform: Dot Net Core Web API, Angular, JavaScript, MySQL, Typescript, Rest API's integrated

C. Project: Trendy Burst

Trendy Burst, an application for publishing advertisements on social media platforms.
In the ecommerce landscape, social media advertising is one of the most efficient and effective ways to reach your target audience and turn them into customers. No other advertising options can deliver the kind of consistent, scalable leads as social advertising.
Role & Responsibilities:
- Designed forms related to candidate information, Designed Dashboard and also release user report and release summary of the post.
- Unit testing & bug fixing reported by QA.
