CERTIFICATIONS

Data Engineers (PySpark / SQL), AWS Certification.

LANGUAGE

English Hindi, Marathi

WORK DETAILS & KEY RESPONSIBILITIES

Organization :- Orion Enovation Pvt Ltd, Mumbai
Project Title : LCW(Less complex audit workflow)
Client Name - KPMG
01 Feb 2022 to 23 Feb 2023

- Understand Test Requirements and deriving test scenarios.
- Documenting test cases and modifying if necessary.
- Selection test cases for automation.
- Inspect Elements. Objects.
- Creation test cases using element locators and selenium web driver commands.
- Enhancing and optimizing test cases using OOP's features.
- Grouping, Prioritizing test cases, Executing Test Batches and Generating reports using TestNG/JUnit and Extent report, with data driven testing, cross browser testing and database testing.
- Analyzing application Logs/Test reports.
- Reporting and tracking of defects.
- Select test cases for regression.
- Perform regression on modified builds, and final regression.

Organization :- Hiergenics India Pvt Ltd, Bangalore
Project Title : OLAP (Oracle permit and Licence)
Client Name - Oracle
10 Aug 2021 to 31 Dec 2021

- Enhancing and optimizing test cases using OOP's features.
- Grouping, Prioritizing test cases, Executing Test Batches and Generating reports using TestNG/JUnit and Extent report, with data driven testing, cross browser testing and database testing.
- Analyzing application Logs/Test reports.
- Reporting and tracking of defects.
- Select test cases for regression.
- Perform regression on modified builds, and final regression.

Organization :- 3i Infotech, Pune
Project Title : Fast Generic system
Client Name - ICICI Lomard.
Aug 2019 to Aug 2021

- Handling and managing based MIS.
- Daily claim processing.
- Claim payment processing for cashless and reimbursement .
- Track accounting process.

Organization :- Cognizant ,Pune
Project Title : Smart Parcel Insights Hub
Domain : Logistics
Client Name : United Parcel Service (UPS), Germany

KEY RESPONSIBILITIES :
- Development of logic based scripts for collecting, cleaning, and preprocessing large datasets/tables using Python libraries Pandas, Numpy etc.
- knowledge of SDLC, Agile Scrum methodologies.
- Excellent business communication and presentation skills.
- Having Analytical Skills, Problem-solving skills, and multi-tasking abilities with utilizing people in making a critical decision
- Excellent Technical writing skills to create Business Requirement Documents (BRD), Functional Requirement Documents (FRD), Technical Documents, Non-functional Requirement Documents, User Stories, User Manual, Test Case Documents, Product Backlog, and Sprint Backlog.
- Created interactive dashboards and reports to communicate insights to stakeholders.
- Creating appropriate documentation that allows stakeholders to understand the steps of the data analysis process and duplicate or replicate the analysis if necessary
- Conducted data analysis and visualization using various tools including Power BI, Excel.

Project Title : Cloud Fusion ERP Predictive Analyzer
Domain : ERP
Client Name : Acumatica, USA.

KEY RESPONSIBILITIES :
- Design, create, develop, configure data pipeline to move data from source system to target system.
- Understanding of data modeling and integration concepts, with the ability to design and implement data architectures.
- Strong programming skills in languages such as Python, PySpark, with experience in data manipulation, transformation, and analysis.
- Understand and Analyze Customer requirements and Business logic.
- Transforming raw data into the requirements by using python pandas, PySpark.
- Perform tasks like data extraction, data manipulation using AWS glue, connecting to databases, load data in to the RedShift, performing SQL queries.
- Discover, design, and develop analytical methods to support novel approaches of data and information processing.
- Perform analysis to assess the quality of the data, determine the meaning of the data, and provide data facts and insights.
- Discover, design, and develop analytical methods to support novel approaches to data and information processing.
- Perform data exploratory analysis using Pandas.
- Attending daily meetings to discuss project milestones.
- Perform analysis to assess the quality of the data, determine the meaning of the data, and provide data facts and insights.
