Professional Summary

Dynamic and technically adept Software Development Engineer in Test, proficient in automation testing, mobile testing, and API testing. Skilled in manual testing methodologies. Possesses a keen eye for detail, strong problem-solving abilities, and a commitment to ensuring software quality and reliability.

Projects

Tutorials Ninja - Reward Points Manual Testing
[Github Repo Link]

JavaScript   Node.js   Excel

- Conducted manual testing concentrating on core functionalities: 'Login', 'Logout', 'Search', 'Payment', and 'Add to Cart'.
- Created comprehensive test scenarios and cases to ensure platform reliability.
- Executed manual testing procedures and documented findings using Excel.
- Focused on identifying potential logic and algorithmic errors in software features.

Tutorials Ninja - Add to Cart, Cypress Automation Testing
[Github Repo Link]

JavaScript   Node.js

- Developed and executed automated test scenarios using Cypress to ensure the functionality of 'Add to Cart' feature.
- Collaborated with the development team to understand requirements and align test cases with platform functionalities.
- Documented and reported software issues with detailed steps for reproducing errors, enhancing communication with developers.
- Created comprehensive test cases for key features like 'Login', 'Logout', 'Search', and 'Payment' to ensure platform stability.
- Utilized Visual Studio Code for managing and documenting test cases, ensuring accuracy and thoroughness in testing processes.
