OBJECTIVE

I aspire to work in an environment that fosters both learning and contribution, enabling the continued growth and success of the organization as well as my own. My goal is to achieve professional and career growth by effectively applying my skills.

EDUCATION

Master of Computer Application, SUK University, Kalaburagi   2024

Bachelor of Science, Nutan Vidyalaya, Kalaburagi   2022
Relevant Coursework: BSc

Pre- University Education, Nutan Vidyalaya PU College, Kalaburagi   2019
Relevant Coursework: Science

Secondary Education, V T S H i g h School, Kalaburagi   2016

SKILLS

Programming:

- Java.
- SQL (Structure Query Language)
- HTML (Hyper Text Markup Language)
- CSS (Cascading Style Sheet)
- Basic Java Script.
- Python

PROJECTS

Project Title: Water quality prediction using machine learning.
Technologies Used: Python, Django
Description: Developed a web application to predict water quality using machine learning algorithms. The project involved building a machine learning model to analyse various water quality parameters and predict the overall quality of water. The application was built using Python with Django as the backend framework, allowing for seamless integration of the machine learning model and providing a user-friendly interface for users to input data and receive predictions. The system was designed to aid in environmental monitoring and ensure safe water consumption

CERTIFICATIONS

- Certification of MathWorks Training Service (2024)
