Ashok Chakravarthi

Mobile No: +9642474274

Email: polisettiashok1@gmail.com

Objective: To secure a challenging position where I can effectively contribute my skills as Software Professional, possessing competent Technical Skills.

Professional Summary:

- Having **7 years of IT Experience** in designing, developing and implementing Web applications using Microsoft Technologies.
- Proficient in **Angular, Asp Dot Net Web Form**, **Asp Dot Net Mvc** application development and **Web Api.**
- Good knowledge on **OOPS**.
- Extensive experience in **Dot Net FrameWork, Angular, C#, Asp Dot Net Mvc, Web Api, Ado Dot Net.**
- Good experience in **HTML, CSS, Java Script, Typescript.**
- Good experience in Unit testing using.
- Having good experience in **SQL Server 2012/2014**. Well versed with **Joins, Stored Procedures, Views, etc.**
- **Azure DevOps** support agile project management methodologies allowing teams to track progress, prioritize tasks, and manage work items effectively.
- Good experience in version control **GIT** and **TFS**.
- Flexibility to adapt to changing needs and requirements.
- Excellent interpersonal skills, outstanding problem solving and decision-making skills.
- Have experience and potential in executing projects in different functional and technical areas.
- Good communication skills with strong working experience directly with coworkers and clients to identify business objectives and deliver requirements proficiently.

Professional Experience:

- Working as a **Senior Software Engineer** at **JARUS Technologies**.
  From August 2022 to April 2025
- Worked as a **Software Engineer** at **JNET Technologies.**
  From February 2018 to August 2022

Qualification:

- **B-TECH (2015)** from Nova Collage of Engineering Technology affiliated to JNTUK.

Technical Skills:

Programming Languages	:	**C#, Dot Net**
Script Languages	:	**JavaScript, J-Query, Typescript**
Web Design	:	**HTML, BOOTSTRAP, CSS, Angular Forms**
Technologies	:	**Angular, ASP Dot Net MVC, ADO Dot NET, Dot Net Framework, Web API**
Database	:	**SQL Server**
Defect Tracking	:	**JIRA, TFS**
Code Management Tool	:	**GIT**
Others	:	**Software Installation/Troubleshooting**

Key Strengths:

- Strong analytical problem determination/solving skills
- Ability to work independently and within a team.
- Willingness to learn.
- Self-Motivated and Goal Oriented.
- Flexibility and adaptable.

Work Experience:

Project #1:

Title	:	**Policy Administration System (YACHT)**
Client	:	**Intact Insurance**
Technologies worked	:	Angular, Web API, Type Script, C#.NET
Database	:	SQL Server
Company Name	:	**Jarus Technologies**
Role	:	**Senior Software Developer**
Duration	:	**October 2023 – April 2025**

Project Description: The Ocean marine business is highly competitive and moves quickly. Know how is pivotal in building a thriving business and in delivering the right solution to help protect it. As a longtime leader in the marine industry, our exceptional expertise and regional focus means we know your local environment and can offer the right coverage to handle your unique set of risk exposures.

Here in this project we deal with several states and make rating and Quote through agent account for Yacht And McGriff(Producers) show the premium of each coverage in Quote document and after if customer is satisfied with that then agent can issue the policy and after that underwriters approve it and begin the application and issue the policy.

Responsibilities:

- Analysis Assigned Tasks and providing the estimate points
- Build, and maintain efficient, reusable, and reliable code using **Angular Frame Work, web API, C#** programming language.
- Unit Testing the module for the proposed functionality.
- Deploying the commit changes **Dev and QA Environments**

- Writing the test cases for the written code.
- Giving the daily status to on-site team on scrum calls.
- Integrating the code of different modules.
- Review the code changes for the other Developer.
- Fixing the bug raised by the QA team.
- Maintaining existing web applications according to the feedback received from the on-site team.
- Assist and support other team members.

Project #2:

Title	**:**	**Policy Administration System (Commercial Output Program and Equipment Breakdown)**
Client	**:**	**Intact Insurance**
Technologies worked	**:**	Angular, Web API, Type Script, C#.NET
Database	**:**	SQL Server
Company Name	**:**	**Jarus Technologies**
Role	**:**	**Senior Software Developer**
Duration	**:**	**August 2022 – October 2023**

Project Description: Businesses that operate in multiple locations might consider a commercial output policy (COP) in order to protect against risk exposures associated with transporting output between different facilities, as well as shipping to customers. The types of companies that may purchase a commercial output policy (COP) include manufacturers, wholesalers, distributors, and other companies that process and assemble goods.

Here in this project we deal with several states and make rating and Quote through agent account for COP and EB show the premium of each coverage in Quote document and after if customer is satisfied with that then agent can issue the policy and after that underwriters approve it and begin the application and issue the policy and Endorsement, Reinstatement, Do not Renewal, Rescind Do Not Renewal, Renewal and Cancellation.

Responsibilities:

- Analysis Assigned Tasks and providing the estimate points
- Build, and maintain efficient, reusable, and reliable code using **Angular and web API, C#** programming language.
- Unit Testing the module for the proposed functionality.
- Deploying the commit changes **Dev and QA Environments**
- Writing the test cases for the written code.
- Giving the daily status to on-site team on scrum calls.
- Integrating the code of different modules.
- Review the code changes for the other Developer.
- Fixing the bug raised by the QA team.
- Maintaining existing web applications according to the feedback received from the on-site team.
- Assist and support other team members.

Project #3:

Title	**: NEVADA CORPORATIONS**
Client	**: P P C (USA State)**
Technologies worked	**:** C#.NET, ASP Dot Net MVC, ADO Dot Net, J-Query
Database	**:** SQL server
Company Name	**: Jnet Technologies**
Role	**: Software Developer**
Duration	**: December 2019 – August 2022**

Project Description: It's an end-to-end web based dynamic ERP system which is specially designed for the states of America, it's a One-Stop Registration Information System has been established to help in navigating the process of setting up a new business, and Searches are provided to obtain information on the status of all entities, trade names, trademarks, and service marks registered in the State of Nevada. Certificates of Good Standing and images of filed documents may also be available for purchase and also involved in the Notary System of Nevada State.

Responsibilities:

- Design, build, and maintain efficient, reusable, and reliable code using C# programming language.
- Used HTML, JavaScript, J-Query and bootstrap to make the application lighter and faster to load into browser.
- Writing the stored procedure in MS SQL server management studio and calling them into ADO Dot Net.
- Writing the function in SQL Server for the repetitive functionality so that can be reused.
- Testing the module for the proposed functionality.
- Integrating the code of different modules.
- Fixing the bug raised by the QA team.
- Maintaining existing web applications according to the feedback received from the on-site team.
- Giving the daily status to on-site team on scrum calls.

Project #4:

Title	**: GEORGIA CORPORATIONS**
Client	**: P C C (USA State)**
Technologies worked	**:** C#.NET, ASP Dot Net MVC, Entity Framework, J-Query
Database	**:** SQL server
Company Name	**: Jnet Technologies**
Role	**: Application Developer**
Duration	**: March 2018 – December 2019**

Project Description: Campaign finance Information System (CFIS) for different states will explains about all funds raised to promote candidates, political parties, or policy initiatives and referendum. Political parties, charitable organizations, and political action committees (in the United States) are vehicles used in aggregating funds to keep campaigns alive. Campaign finance deals with "the costs of democracy"

Responsibilities:

- Design, build, and maintain efficient, reusable, and reliable code using C# programming language.
- Used HTML, JavaScript, J-Query and bootstrap to make the application lighter and faster to load into browser.
- Writing the stored procedure in SQL server management studio and calling them into ADO Dot Net.
- Writing the function in SQL Server for the repetitive functionality so that can be reused.
- Testing the module for the proposed functionality.
- Fixing the bug raised by the QA team.
- Maintaining existing web applications according to the feedback received from the on-site team.
- Giving the daily status to on-site team on scrum calls.

Personal Profile :

Gender	**:**	Male
Languages known	**:**	English, Hindi & Telugu.
Fathers name	**:**	P. Ramesh Babu
Hobbies	**:**	Listening music, Playing Chess, Learning new things.
Email Id	**:**	polisettiashok1@gmail.com
Strengths	**:**	Quick learner, Hardworking, Friendly in nature, Believe in myself.

Declaration :

I hereby declare that the information furnished by me is true to the best of my knowledge. I would be glad to perform the duties you wish to assign to me consistently and competently.
