Professional Summary

Dynamic Full Stack Developer with expertise in HTML5, CSS3, JavaScript, and Python. Proficient in building robust web applications using Django and REST Framework, combining front-end and back-end technologies to deliver seamless user experiences. Strong understanding of data structures and algorithms to optimize performance and scalability. Committed to writing clean, maintainable code while collaborating effectively within agile teams. Passionate about leveraging modern web technologies to create innovative solutions that meet business objectives and enhance user engagement.

Projects

Study Buddy   Github Repo Link

Django Rest Framework   SQLite3

- Developed RESTful APIs using Django Rest Framework for managing users, subjects, groups, and study sessions with secure authentication and optimized SQLite models.
- Ensured seamless API integration with frontend components through collaboration and thorough testing for stability and reliability.

Terminal Typing Master   Live Demo Link   Github Repo Link

React   Node   Express.js

- Developed a terminal-based typing test application in Python, utilizing JSON to manage lists of random words for the test.
- Implemented efficient algorithms for real-time performance and designed various typing metrics calculations, including words per minute (WPM).
