EXPERIENCE

Doccot (Amethyst Oak Pvt. Limited), Bangalore — *CEO and Founder*
https://doccot.com/

August 2022 - Present

Helping design teams boost their design standing by providing tools to manage and host their design work and in process improving intra-company design standards and consistency.

Used by organizations like ShadowFax, Vymo, Nova Benefits, UpskillList and many other design first organizations.

UBER , Bangalore — *Engineer II*

Feb 2021 - July 2022

Early member of the Edge team at Uber Bangalore, working with an exciting team to help Uber scale,be fault tolerant and ready for the future. My responsibilities

- Building and maintaining external api portal for Uber i.e. https://developer.uber.com
- As we moved to Envoy Proxy as core for our API Gateway, my task was to scaffold and bootstrap the new Control Plane (including setting up observability) to support the data plane for endpoint deployment and management

- Maintaining the current Control Plane and allowing feature requests, respond to alerts and downtimes
- Frameworks used - React, GoLang

Freelance Projects

March 2020 - January 2021

Got some time for myself to build various products for different ecosystems, one of them was Clipmag - https://github.com/m4nitesh/clipmag a hover style clipboard app for MacOS.

Worked on a Flutter app to build AuthZ approved personal document verification Android/iOS app

ShareChat, Bangalore — *Software Engineer*

Dec 2019 - March 2020

Working on bootstrapping a new e-commerce platform for ShareChat that included creating new services and app integrations.

Shipsy, Gurgaon — *Software Engineer*

June 2018 - December 2019

Lead a team of **7 Devs** in development and scaffolding of the Shipment/Vessel project and helped the company pivot in the shipment industry.

Separately, worked on Rider app in refracting/developing and managing fortnightly release cycle as the owner.

Cricnwin, Gurgaon — *SDE I*

Aug 2017 - May 2018

Single handedly built the Android app from scratch and Node.js services, this included designing and UX of the android.Scaling app from 50k to 400k users.Implemented RxJava, dependency injection libraries like Dagger/Butterknife, etc.

Truefy and Rent-It, Bangalore — *Co-Founder*

March 2016 - March 2017

Worked as both product manager and Lead Developer

RentIt - Aggregating rental operator in tourist places

Truefy- NFC tag based solution for Oil companies to help in detection of counterfeiting.
