PROFILE

Dynamic Lead Software Consultant with over 13 years of experience, excelling in driving impactful software solutions. Demonstrated expertise in cloud technologies, particularly AWS and Azure, alongside a solid foundation in microservices and .NET frameworks. Recognised for outstanding contributions, including significant cost reductions and enhanced database performance, while leading initiatives in e-governance and cloud migrations. Committed to fostering teamwork and mentoring to cultivate innovative, high-performing teams. Passionate about advancing skills in Generative AI and Data Engineering to tackle complex challenges across diverse industries.

EMPLOYMENT HISTORY

❖ **Lead Software Consultant, Regenesys Business School** .... May 2022 — Apr 2025

In the role of Lead Software Consultant at Regenesys Business School, responsibilities include overseeing software development projects from inception to completion. This position entails collaborating with various stakeholders to gather requirements and ensure that solutions align with educational goals. Leadership of a talented team is crucial in driving innovative software solutions that enhance the learning experience.

- Successfully implemented a cloud-based learning management system, improving course accessibility for students.
- Recognized for excellence in e-Governance initiatives, contributing to award-winning projects.
- Reduced database size significantly, resulting in improved performance and cost savings for the organization.
- Led the migration of project resources to AWS, enhancing system scalability and reliability.

❖ **Technical Lead, MPOnline LTD.** .... Sep 2017 — Mar 2022

As a Technical Lead at MPOnline LTD., the focus was on guiding software development teams to deliver high-quality applications. This role involved strategic planning and execution of projects, ensuring that technical standards were met. Collaboration with cross-functional teams facilitated the integration of user feedback into development processes, enhancing overall product functionality.

- Instrumental in winning the SKOCH Award of Merit for outstanding project delivery.
- Enhanced system performance through the adoption of best practices in software development.
- Mentored junior developers, fostering a culture of continuous learning and improvement.

❖ **Programmer, Election Commission** .... Aug 2011 — Aug 2017

During tenure as a Programmer for the Election Commission, responsibilities included developing software solutions to support electoral processes. This role required a keen understanding of user requirements and the ability to translate them into effective technical solutions. Collaboration with various departments ensured that software systems met operational needs and maintained security standards.

- Played a key role in enhancing the efficiency of electoral management systems.
- Contributed to several successful initiatives recognized by governmental awards.
