EXPERIENCE

Smile 2 Steps - Software Engineer

Dec 2024 - Feb -2025

- Developed a **QR Code Management System** with dynamic generation, validation, and tracking using **React.js, Flask, and PostgreSQL**.

- Built a **mobile-first, responsive landing page** from scratch using **React.js and CSS**, ensuring performance and accessibility.

- Created a **Two-Way Traffic System** for safe movement between parents & pedestrians, integrating real-time traffic control.

- Implemented **secure data handling and optimized user experience** across all projects with structured backend logic and UI improvements.
