SUMMARY

I have 8.0 years of relevant experience in Software Testing, specializing in both Manual and Automation Testing. I am seeking a **Software Automation Testing Engineer** position where I can leverage my expertise in both automation and manual testing. I aim to contribute to a reputable organization by utilizing the skills and knowledge I have gained through my professional IT career.

EXPERIENCE

07/2021 - 10/2024

Pune, India

Automation Tester
Codewalla software development
1Huddle :

- Developed and implemented automated test scripts using **Selenium WebDriver, Cucumber and TestNG** for **functional** and **regression testing** to ensure the quality of web application.
- Involved in the development of a custom automation framework based on the Page Object Model (POM), which increased the maintainability of test scripts.
- Integrated test automation into **CI/CD pipelines** using **Jenkins**, enabling continuous testing with every build and ensuring early defect detection.
- Utilized **HTML** and **Extent Reports** within the framework to get detailed and interactive test reports.
- **Manual testing** efforts across various web and mobile applications, performing **functional, regression, and usability testing** to ensure applications meet quality standards.
- Collaborated closely with developers, product owners, and business analysts to review requirements and ensure complete test coverage across all functional areas.
- Familiar with performance testing tools like **JMeter** for validating the load-handling capabilities of web application.

07/2020 - 05/2021

Pune, India

Software Test Engineer
Peek Software Development
Peek :

- **Manual testing** on web and mobile applications, performing **functional, regression, and usability testing** to ensure applications meet quality standards.
- Created detailed **test plans, test cases**, and executed them based on business requirements, ensuring comprehensive test coverage.
- Worked with product teams to define **acceptance criteria** and conducted **User Acceptance Testing (UAT)** to validate software functionality from the end-user perspective.
- Hands on experience working in Agile environments, participated in daily standups, sprint planning, and retrospectives.
- Executed automated test cases using **Selenium WebDriver** and **TestNG**, achieved efficient test execution for web application.

03/2019 - 07/2020

Pune, India

Software Test Engineer
Codewalla Software Development
GROM :

- Performed Functional and Regression testing on Web Applications**,** iOS, and Android Apps**.**
- Conducted functional testing for **Ionic apps** on both iOS and Android devices.
- Reported and tracked defects using **JIRA**,
- Written and executed Automation script for particular modules using Selenium.
- Developed **Test Scenarios**, **Test Data**, and **Test Cases/Scripts** based on project requirements and functional specifications.
- Performed **Ad- Hoc** testing to assess application behavior in an unstructured manner, identifying critical issues and providing feedback during the development cycles.
- Created API test scripts using **Java Script** and automated the testing process by running the collections using **Postman.**

01/2016 - 03/2019

Pune, India

Software Test Engineer
Codewalla Software Development
L2O :

- Responsible to work closely with senior team members to understand and deliver the quality of product.
- Conducting **Smoke** and **Sanity** tests to determine if the application is ready for deeper testing.
- Participated in **regression testing** to verify application stability post-changes and updates.
- Written and executed test cases manually.
- Worked on **TestRail** Test management tool with basic level.
- Familiar with testing techniques such as boundary value analysis, equivalence partitioning, and exploratory testing.
- Skilled in preparing test documentation including test plans, test cases, and test summary reports.

EDUCATION

2011 - 2014
MCA (Master of Computer Application) CGPA - 7.6
Basaveshwar Engineering College

SKILLS

Primary Skills :

Selenium WebDriver   Java   Java Script   Cucumber   Page Object Model (POM)   TestNG   Git   Agile methodologies

Manual Testing   SDLC   JIRA

Secondary Skills :

Rest Assured   Postman   JMeter   Jenkins

Other Skills :

Knowledge on Playwright   Basic Python   TestRail   ChatGPT

INTERESTS

I'm eager to explore how machine learning and artificial intelligence can be applied to testing, such as using AI for test optimization and smart bug detection.

I am interested in expanding my skill set by integrating DevOps principles into the QA process.
