Infosys

Professional Summary

Innovative Full Stack Web Developer skilled in MERN stack, JavaScript, and RESTful API design. Adept at using Generative AI and quickly mastering new technologies. Demonstrates strong problem-solving, collaboration, and communication abilities to deliver seamless, scalable web applications. Committed to continuous learning and software excellence.

Projects

W3 Schools Website Replication
[Github Repo Link](#)

JavaScript React HTML5 CSS3

- Replicated the full frontend of the W3Schools site using HTML, CSS, JavaScript, and React.
- Demonstrated proficiency in React for building and maintaining the web application.
- Showcased design and coding skills through practical construction.
- Implemented server-side coding practices with a focus on web development excellence.

Food ordering Website   [Github Repo Link](#)

JavaScript React HTML5 CSS3

- Collaborated with product managers and designers to translate requirements into a functional and scalable food ordering platform.
- Designed and developed frontend components using React.js to create an easy-to-use interface for browsing menus and placing orders.
- Implemented secure payment options and real-time order tracking to enhance user experience and reliability.
- Ensured seamless integration with backend APIs to provide smooth interactions and data flow within the application.
- Conducted thorough testing and debugging to ensure application reliability and resolve any issues promptly.
