Prajakta Rajendra Bankar

Software Engineer

I seek employment with a company where I can grow professionally and personally and also utilize my technical skills for the growth of company and also work as an active member for organization for adding valuable assets.

Experience

○ **Personal projects**

Speech Emotion Recognition Using, Machine learning

Dataset used : Ravdess dataset,
1)The idea behind creating this project was to bulid a machine learning model that could detect emotions from the speech we have with each other all the Time.
2)In this project we give audio sample as a input then we use multilayer perceptron(machine learning algorithm) for feature extraction. and then finally result is calculated which emotion is present in that audio file.
3) In this Ravdess dataset happy, sad, anger, disgust, fearful this emotions are present.

○ **Portal for Farmer to sell their produce at better rate.**

1) This project is mainly for farmer purpose.
2)In this project I create a website using html, css, bootstrap and for storing data we use PHP-My admin database.
3)The main importance of this project is to give the better rate to the farmer from the wholeseller or from any user.
4)and also there is chatboat is placed inside the application for the communication purpose.
5)The main aim of this project is farmer can deliver the product by himself only so that he can get more profit rather than deliver by the agent

○ **Company Projects**

Jr.Software Engineer | Cognizant | 08/2022 -present

Software Engineer Intern(Jan 2022 - May-2022)

- **Task 1**- Implement Get method
I created the Get method functionality with SQL data and integrate with swagger and test the same rest api with the help of postman and swagger and also same rest API call from another web app project and also write the unit test for both application.
- **Task 2**- Token based Authentication using Web api.
Created this Token based authentication for security purpose.
- **Task3-**Creating the Controller in MVC.
Created the controller and also create the View for action method.
- **Task4-** Crud Operations.
performing the CRUD operations in ASP Dot net core. Connected the database with the help of entity framework and stored procedure.
- **Task5-** Basic application In react js.
Created the basic application in Reactjs.
- **Task6** - CRUD operations in React js
performing the Crud operation in React js.

Jr. Software Engineer (1 year 5 months)
