EDUCATION

Bachelors of Computer Application
Dev samaj collage, Sector 45, Chandigarh 160101
July 2021 - June 2024

TECHNICAL SKILLS

- SQL
- Python
- Power BI
- Microsoft Excel
- Machine learning

SOFT SKILLS

- Adaptability
- Time Management
- Teamwork
- Effective Communication

ACHIEVEMENTS

Masai Speaking Marathon 🔗
MASAI
Construct Week Participation Certificate 🔗
MASAI

CERTIFICATIONS

Data Analytics using Excel 🔗
Great Learners Academy
Data Analytics using SQL 🔗
Great Learners

PROFESSIONAL SUMMARY

Accomplished Data Analyst with proficiency in SQL, Python, and R, adept at creating impactful data visualizations using Tableau and Power BI. Exceptional problem-solving and effective communication skills enhance stakeholder engagement. Quick to learn and apply Generative AI for innovative solutions and process improvements.

WORK EXPERIENCE

Concentrix

Customer Service Advisor | January 2022 – July 2024

- Collaborated with cross-functional teams to ensure document accuracy and resolve complex customer issues efficiently.
- Contributed to enhanced data quality by maintaining the integrity of customer documentation processes.

PROJECTS

Airbnb Price Analysis | ⊙

- Analyzed extensive Airbnb data using Python and MySQL to identify key factors influencing rental rates.
- Implemented data cleaning and transformation techniques using Pandas and NumPy for comprehensive analysis.
- Explored city-wise pricing trends and variations, providing actionable insights for optimizing host earnings.
- Developed an interactive Power BI dashboard to visualize metrics and support stakeholders' data-driven decisions.
- Integrated real-time filtering features for detailed analysis of room types, locations, and booking dates.

Indian Job Market | ⊙

- Designed and developed a Power BI dashboard to analyze job trends for Data Scientists and Analysts in India.
- Collected and cleaned data to ensure accuracy and consistency in the job market analysis.
- Identified key trends in job preferences, top locations, and required education levels to provide actionable insights.
- Created visualizations to effectively communicate salary trends and in-demand skills such as Python, Power BI, and SQL.
- Provided insights and recommendations for job seekers and recruiters based on comprehensive data analysis.
