Profile Summary

Highly skilled and motivated Full Stack Developer with a proven track record of delivering top-notch solutions. Specializing in a wide range of technologies including Laravel, PHP, Python, Django, Node.js, Angular, React, Next.js, and Vue. Proficient in utilizing Docker, AWS Lambda, and implementing Microservices architecture. Well-versed in Go Lang with a keen eye for detail and a passion for problem-solving. Experienced in WebSocket for real-time communication and gRPC for efficient, scalable API development. Excited to bring expertise and creativity to your team as an immediate joiner.

Professional Skills

- **Front-End Technologies:** HTML5, CSS3, JavaScript, React, Angular, Vue, Next.js
- **Back-End Technologies:** PHP, Laravel, Node.js, Express.js, Python, Django, Golang
- **API Development:** RESTful, GraphQL, gRPC
- **Real-Time Communication:** WebSocket
- **Databases:** MySQL, MS SQL, PostgreSQL, SQLite, MongoDB
- **Version Control:** Git
- **Command-Line Tools:** npm, pip, Composer, yarn
- **Deployment:** AWS, Azure, Google Cloud
- **Additional Expertise:** Docker, AWS Lambda, Micro services, Go Lang

Experience

Senior Full Stack Developer
Shootup Technologies *Pvt Ltd* (June 2024 – Present)

- Developed and maintained a trading platform for FP Markets, enhancing seamless integration with financial market data and trading tools.

- Utilized React, Laravel, Next.js, Vue Js and MySQL to create a comprehensive solution that allows traders to execute trades, analyze market trends, and manage accounts efficiently.

- Integrated real-time market data and trading APIs to ensure smooth execution, data accuracy, and interoperability.

- Collaborated closely with the development team to design and implement robust backend and frontend components for optimal user experience.

- Contributed to the project's technical architecture, ensuring scalability, security, and high performance.

- Currently involved in ongoing development and enhancements to meet evolving trader needs and market demands.

FullStack Developer

Yosi Care Pvt Ltd (Jan 2024 – May 2024)

- Developed and maintained a healthcare integration project aiming to seamlessly integrate Electronic Medical Record (EMR) systems like ATHENA and CERNER with Yosi's platform.
- Utilized React, Laravel, Next.js, and MySQL to create a comprehensive solution allowing patients to conveniently book appointments with doctors.
- Integrated ATHENA and CERNER EMR systems to ensure smooth data exchange and interoperability.
- Collaborated closely with the development team to design and implement robust backend and frontend components.
- Contributed to the project's technical architecture ensuring scalability, security, and performance.
- Currently involved in ongoing development and enhancement to meet evolving client needs.

Senior PHP Developer

Loma Technology Co Ltd (Sep 2022 – Jul 2023)

- Developed an e-commerce platform where customers could book product slots ranging from $1000 to $10000 with just $1.
- Utilized microservices architecture with Laravel Framework, Next.js (React), and Quasar Framework (Vue 3).
- Led the team in technical leadership, project architecture, and ensuring security and compliance.

- Created a currency exchange platform allowing users to select exchange rates posted by potential buyers.
- Implemented microservices architecture using Laravel Framework, Next.js (React), and Quasar Framework (Vue 3).
- Responsible for system architecture, backend development, and integration with external APIs.

- Developed an application for HR to schedule interviews, create question sets, and enable online video interviews.
- Collaborated on architecture design, utilized Quasar Framework for user interfaces, and managed MySQL and PostgreSQL databases.

Senior Software Developer

*Heptagon Technologies Pvt Ltd (*Feb 2021 - Aug 2022)

- Developed an E-Commerce-based application using Angular 4, Laravel, and MySQL.   Implemented secure login authentication modules to enhance security.
- Integrated multiple payment services such as GPay, PhonePe, PayTM, and FreeCharge for seamless transactions.
- Designed and developed features for invoice generation, staff management, and PDF bill generation.
- Implemented automated email notifications for transactional updates.

Senior Software Developer

Tradezap (Dec 2019 – Jan 2021)

- Built a social network application for New Zealand youth enabling sharing of posts and comments.
- Developed features for job matching based on professions utilizing Laravel Framework and MySQL database.

Web Developer

DreamGuys Technologies Pvt Ltd (Sep 2017 – Jul 2019)

- Created an application for users to connect through calls, video calls, and chat based on mutual contacts and friends.
- Implemented premium features for paid users including payment integration using Stripe Payment Gateway.
- Utilized Codeigniter Framework for backend, Angular for frontend, and MySQL database.

Associate Developer

ldreamDevelopers (Jun 2016 - Aug 2017)

- Developed a hospital management application using Angular, CodeIgniter, and MySQL.
- Implemented authentication-based access for doctors to securely manage patient records.
- Designed a system to store and track patient history and treatment data, eliminating the need for physical copies.
- Integrated complete dispensary and surgery management to streamline operations efficiently.
- Ensured a seamless workflow for hospital staff by optimizing data management and reducing manual processes.

Senior PHP Developer

G3 Interactive (Jun 2015 - Jun 2016)

- Developed a web-based platform for an Australian tree-planting initiative, integrating Google Maps to track planting locations.
- Utilized PHP, JavaScript, HTML, CSS, AJAX, and CodeIgniter with MySQL as the backend for efficient data management.
- Implemented secure login authentication for employees to access location-specific tasks.
- Designed features to monitor tree-planting progress and manage multiple project sites effectively.
- Developed modules for employee and volunteer management to streamline participation.
  Integrated a multi-admin system for role-based access and project oversight.

PHP Developer

ldreamDevelopers (May 2013 - Jun 2015)
- Developed a web-based database system using PHP, JavaScript, HTML, CSS, AJAX, and CodeIgniter with MySQL as the backend.
- Implemented secure login authentication modules for enhanced security.
- Designed features to organize the organization and manage multiple branches efficiently.
- Developed modules for staff and customer details management to streamline operations.
- Integrated a multi-admin system to allow role-based access and control.

Education

- **Bachelor of Engineering in Computer Science and Engineering**
  PTR Engineering College, Madurai – 2012

Personal Profile

- **Name:** Boominathan
- **DOB:** 11-03-1991
- **Nationality:** Indian
- **Gender:** Male
- **Marital Status:** Married
- **Languages Known:** English, Tamil
- **Permanent Address:** 278 DR Radhakrishnan Nagar, Peedampalli, Coimbatore-16
